Earthworks
-culvert head walls and geometry.. RCP, RBC length, rls, easting northings
- workshop, sbeds.. xyz dimensions and options.
- Stockpiles geometry, also calc live volume for bottom reclaim. .
-turkey nest dam storage (multiple,cells)
-

Concrete
-footings & pedestals
-drive in sumps
-floor sumps
-hd bolt geometry
-

Structural
-conveyor trestles
-conveyor gantries
-stair flights and towers
-ladders
-step ladders
-sump pump frame
-swing doors handrails
-

Mechanical
-sump pumps
-warman pumps
-pump hoppers square, cylindrical tapered bottom, conical,
-tanks, incl baffles and agitator platforms
Hd geometry, inspection hatches, roofs manways,

-tank clean out doors
-conveyor
  -cv profile and data sheets
  -cv Head chute geometry.
  -cv head frame
  -cv tail frame
  -gravity takeup geometry
  -conveypr drive geometry
  -conveyor pulley and drive
- thickeners and underflow pumps.
-reagent mix + storage tanks (haz goods)
With options

-gravity launder
-flotation cells
-grinding and milling
  -sag mill
  -ball mill
-classification
  -cyclones
-wet screen feedbox
-wet screen oversize
- rom bin
-static rom bin grizzly
-hungry boards
-Mill discharge hopper

Muli discipline
-sump, pump & frame
-rom bin, grizzly and humgry board

Piping
-Pump suction
-hydrants
-sharkfin samplers library
-

Electrical
-switchroom
-transformers
-cable tray block library and/or python script for autocad
-lights
-control panels
- light power reticulation.
-bess farm

Layout,
-Dry plant
-Stockpile and reclaim
-Grinding
-conveyors
-cil
-thickeners
-reagents
-Vendor, catalog and existing project drawings and models as assets.
- camp, calculate size.

In study model, option to do iterative versions of layout based on information provided.
Allow ability to reject bad design with notes and why rejected.
Allow selection of one or more different options

with ability to iterate new deaigns based on feedback provided.

Ability to save project information
Reuse and duplicate for new project.
